

Fairmount Rehabilitation Programs at Kennedy Krieger Institute

Who We Are

The Fairmount Rehabilitation Programs at Kennedy Krieger Institute offer an array of interdisciplinary therapy programs for patients with injuries and disorders of the brain, spinal cord, and musculoskeletal system. Regardless of their needs, our goal is to help put our patients on the path to improving their functional skills and enhancing their health and fitness.

Who We Serve

Depending on which of the Fairmount Rehabilitation Programs is right for your child, we can provide services for children from age one year to young adulthood. We see patients with a range of diagnoses, including:

- Cerebral palsy
- Acquired brain injury
- Spinal cord injury or dysfunction
- Musculoskeletal disorders
- Brain tumor
- Chronic pain
- Stroke

Our Team

The professionals who make up our interdisciplinary team are experts in a variety of disciplines, such as:

- Pediatric rehabilitation medicine
- Physical therapy
- Occupational therapy
- Speech language pathology
- Neuropsychology
- Special education
- Social work
- Nursing
- Behavior psychology

Additional consultative services are available, as needed, in these areas:

- Orthopedics
- Neurology
- Adaptive equipment
- Assistive technology
- Psychiatry
- Nutrition

Our Treatment Approach

All of our programs provide interdisciplinary treatment from a team that works together to meet our patients' needs. When a patient begins any of the Fairmount Rehabilitation Programs, our team works closely with the family to develop an individualized treatment plan, with an overarching goal of increasing independence at home, in school, and in community life.

We are all born with great potential.
Shouldn't we all have the chance to achieve it?

Kennedy Krieger Institute
UNLOCKING POTENTIAL

Our Programs

Specialized Transition Program

Our day hospital model was developed to treat children and adolescents with intensive therapeutic needs. We provide a full range of cognitive and physical rehabilitation services for neurological and orthopedic conditions.

Constraint-Induced and Bimanual Therapy Program

Through this program, we provide intensive therapy for children and adolescents with hemiparesis. We use an evidence-based understanding of the brain's natural ability to form new connections to increase function and independence.

Focused Interdisciplinary Therapy Program

This program offers intensive therapy to children and adolescents with persistent, disabling conditions. Treatments target specific therapeutic goals to help patients improve their physical abilities, daily activities, communication skills, and cognitive skills.

Healthy Lifestyles Therapy Program

This program is designed to help children and adolescents with physical impairments explore exercise options. Our experienced therapy team helps patients build a fitness program, and identify ways and venues to continue their regimen in their home or community.

Community Rehabilitation Program

This program provides rehabilitation in the patient's home and other important community settings. Our services range from intensive daily therapy for patients with acute needs, to helping individuals with less severe issues return to community activities.

Kennedy Krieger Institute recognizes and respects the rights of patients and their families and treats them with courtesy and dignity. Kennedy Krieger Institute provides care that preserves cultural, psychosocial, spiritual, and personal values, beliefs, and preferences. Care is free from discrimination based on age, race, ethnicity, religion, culture, language, physical or mental disability, socioeconomic status, sex, sexual orientation, and gender identity or expression including transgender. We encourage patients and families to become active partners in their care by asking questions, seeking resources, and advocating for the services and support they need.
